

# Join the LeadSafeCNY Coalition!

An alarming number of Syracuse children are being poisoned by lead. Lead harms a child's developing brain and can cause learning and behavior problems. Once the damage is done, it's irreversible.

## The LeadSafeCNY Coalition works to:

- Educate the community on the risks of lead and provide tips for the prevention of lead poisoning
- Promote blood lead level testing in children
- Construct new housing that is free of lead
- Renovate existing homes to make them lead safe
- Advocate for effective lead violation and housing code enforcement

about how  
you can get  
involved!

# Join us in our mission to help decrease the region's childhood lead poisoning rates!

## Ways you can get involved:

- Attend quarterly meetings to stay informed about current projects
- Assist with planning special events
- Learn about public policy and legislation
- Share information on social media
- Help us spread community awareness about lead testing and prevention
