

## How-To Re-Scan

### HOW-TO RE-SCAN

1. Using your television's remote control, press the Menu or Settings option.
2. Note: a "Smart TV" may have a smart button that must be used to access the settings menu. It will generally have the manufacturer's logo on it.
3. Locate Channels or Tuner Set Up option.
4. Check the menu for an option of Antenna Type or Connection Type.
5. Make sure that the designated setting is OTA/Antenna From the menu, choose Channel Search (based on manufacturer, alternate choices may include Channel Scan, Channel Search or Auto program).
6. Allow the TV to complete the search. You will see a bar listing how many channels have been found. The process may take up to an hour, but is usually much faster
7. Once complete, confirm the menu prompt, then press an exit or quit option.

Please note that every TV varies. If you are unable to complete these steps, please consult the instruction manual that came with your TV or pull up the instructions online.

For a DTA, the process is much simpler. Unplug the DTA from power, wait 30 seconds, and then plug it back in. The DTA will automatically complete a channel scan.
