Chaos in Enterprise America?

Many citizens have expressed their views on the state of our once wonderful town. The streets have become a lawless no man's land, similar to the outside wastes. Our officers have been assaulted, ignored, and otherwise disrespected in the town square. One citizen, a Mr. O'Donnell attacked unarmed officer Peter McMahan two times today. In the shops, messy workplaces have kept the city's Environmental Control Officer busy. This one little town in the middle of an irradiated wasteland is all we have, so please... respect our government workers and go home proud to have been part of Enterprise America.

Breaking News!

Today, at about 10:15 AM, the bank president, Joshua Pierce, discovered that his desk lamp was not working. We then realized that we are supposed to be getting energy from BBC Utility Company, because we are paying them for electricity. We wondered if we are paying them for it, why we weren't getting it. Me and my fellow reporter, Coralista Ruge, went to the Utility Company to ask them why the lamp in the bank president's office was not working. The accountant of BBC, Kacen Chigaridas, said they were not having any problems with the electricity and informed us the the lamp may just not be plugged in. We then went back to the bank and asked them if the lamp was plugged in. It turns out that the lamp was indeed not plugged in.
